Newly updated with the latest information on inflammatory
bowel disease, Curbside Consultation in IBD: 49 Clinical
Questions, Third Edition contains brief, practical, and
evidence-based answers to the most frequently asked
questions that are posed during a "curbside consultation"
between surgical colleagues. Drs. David T. Rubin, Sonia
Friedman, and Francis A. Farraye are joined by an expert
group of contributors, offering advice, preferences, and
opinions on tough clinical questions commonly associated
with IBD. With a unique Q&A format, this text provides quick
access to current information. Numerous images, diagrams,
and references are included to better illustrate IBD. Some of
the questions answered inside the Third Edition include: What
are the new approaches to using and minimizing steroids?
What is the evolving role of calcineurin inhibitors in IBD?

Where should anti-IL-23 therapy be placed in the therapeutic algorithm for Crohn's disease and ulcerative colitis? What should the clinicians and patients know about biosimilars? What are JAK inhibitors? And when should they be used in IBD? What is the approach to loss of response to biological therapy? How should we screen our patients with IBD for depression and anxiety? With information basic enough for trainees and expert practical advice that even high-volume clinicians will appreciate, Curbside Consultation in IBD: 49 Clinical Questions, Third Edition is a must-have.

Gastroenterologists, surgeons, IBD nurses and advanced practice providers, and medical and surgical trainees at all levels will benefit from the user-friendly format and up-to-date advice for complicated cases.

Curbside Consultation in IBD: 49 Clinical Questions has been updated into a Second Edition! The Second Edition contains new questions and is completely updated! Are you looking for concise, practical answers to questions that are often left unanswered by traditional inflammatory bowel disease (IBD) references? Are you seeking brief, evidence-based and updated advice for complicated cases or complications? Curbside Consultation in IBD: 49 Clinical Questions, Second Edition provides quick and direct answers to the thorny questions commonly posed during a "curbside consultation" between colleagues. Dr. David T. Rubin, Dr. Sonia Friedman, and Dr. Francis A. Farraye are joined by a world-class group of contributors on the Second Edition, which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with IBD. The unique Q&A format provides quick access to current information related to IBD with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references are included to better illustrate IBD. Some of the questions that are answered

inside the Second Edition include: * How can I clarify the diagnosis in my patient with indeterminate colitis? * What is the role of concomitant immunomodulators with biologic use in IBD? * When in the treatment algorithm should methotrexate be considered for Crohn's disease? Is there a role for low-dose methotrexate in the prevention of immunogenicity? * How should we be using fecal markers such as lactoferrin and calprotectin in our patients? * Should I use chromoendoscopy in my surveillance colonoscopy in IBD? How and which agent? * What is the updated approach to antimetabolites and biologic therapy in IBD and pregnancy? * When should I consider anti-integrin therapy for my patient with IBD? Curbside Consultation in IBD: 49 Clinical Questions, Second Edition has been updated with new questions and answers, and has chapters organized by topic. The format provides information that high-volume clinicians will appreciate, and yet is basic enough for trainees and students.

Are you looking for concise, practical answers to questions that are often left unanswered by traditional IBD references? Are you seeking brief, evidence-based advice for complicated cases or complications? Curbside Consultation in IBD: 49 Clinical Questions provides quick and direct answers to the thorny questions commonly posed during a "curbside consultation" between colleagues. Dr. David Rubin, Dr. Sonia Friedman and Dr. Francis A. Farraye have designed this unique reference, which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with IBD. The unique Q&A format provides quick access to current information related to IBD with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references are included to enhance the text and to illustrate IBD. Curbside Consultation in IBD: 49

Clinical Questions provides information that high-volume clinicians will appreciate, and yet is basic enough for residents. Gastroenterologists, fellows and residents in training, surgical attendings, and surgical residents will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered:

- Which patients might be better for a “top down” approach (using anti-TNF therapy before steroids or proven failure of oral thiopurines)? What clinical behavior or serological markers might you use to identify these patients?
- When is it appropriate to switch to another biologic therapy?
- Should I be using chromoendoscopy in my surveillance colonoscopy in IBD? How and which agent? Would narrow band imaging be an alternative for this?
- Can we follow flat low-grade dysplasia? Is any dysplasia really flat or just a spectrum of depth and size?
- If women continue infliximab therapy during pregnancy, what are the implications for the baby? What should we be telling our patients about vaccinations?

Are you looking for concise, practical answers to questions that are often left unanswered by traditional references? Are you seeking brief, evidence-based advice for complicated cases or complications? Curbside Consultation in Endoscopy: 49 Clinical Questions provides quick and direct answers to the thorny questions commonly posed during a “curbside consultation” between colleagues. Dr. Joseph Leung and Dr. Simon Lo have designed this unique reference, which offers expert advice, preferences, and opinions on tough clinical questions and situations commonly encountered in endoscopy. The unique Q&A format provides quick access to current information related to therapeutic endoscopy with the simplicity of a conversation between two colleagues.

enhance the understanding of endoscopy. Curbside Consultation in Endoscopy: 49 Clinical Questions provides information basic enough for residents while also incorporating expert advice that even high-volume clinicians will appreciate. Gastroenterologists, fellows and residents in training, surgical attendings, and surgical residents will all benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • You were called by the ER physician regarding a woman who attempted to commit suicide by drinking some "toilet cleaning solution". There were obvious burns around the mouth and tongue. What would you do next? • Is there a role for metal stents in benign bile duct strictures? When should I use plastic stents in this setting? • When Is EUS Necessary for a Newly Diagnosed Cancer of the Esophagus, Stomach, Colon, or Pancreas? • I have difficulty controlling the direction of a biliary papillotomy. Any tricks to improve the results? • What Are the Features that Differentiate a Submucosal Bulge from a True Mass on Capsule Endoscopy? What Can I Do to Confirm a Submucosal Mass?

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional pediatric GI references? Are you seeking brief, evidence-based advice for complicated cases or controversial decisions? Curbside Consultation in Pediatric GI: 49 Clinical Questions provides quick answers to the tricky questions most commonly posed during a "curbside consultation" between pediatricians. Drs. Joel R. Rosh and Athos Bousvaros have designed this unique reference which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with pediatric GI. The unique Q&A format provides quick access to current information
