The most popular forms of FIDIC contracts are contained in the 1999 Silver and Red Books. Once the contract is signed in Russian, parties need to be very careful about the translation. There is no official translation of FIDIC contracts in Russian and most of the existing, unofficial translations are rather inaccurate.

fidic red russian

In September 1999, FIDIC introduced its new Suite of Contracts,which included a “ new ” Red, Yellow, Silver and Greenforms of contract. The “ new ” Red Book was intended toreplace the 1992 fourth edition of the Red Book, with the ambitionthat its use would cease with time. This ambition has notmaterialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been verylittle published on the new concepts adopted in them and how theyinteract with the previous forms. This important work considersthese aspects together with the many developments affecting thefourth edition of the Red Book that have taken place since 1997,when the second edition of this book was published, and relatethem to key contracting issues. It is written by a charteredengineer, conciliator and international arbitrator with wideexperience in the use of the FIDIC Forms and in the various disputesresolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms ofcontract; · a detailed comparison of the wording of the1999 threemain forms, which although similar in nature; it neverthelesssignificantly differs in certain areas where the three formsdiverge due to their intended purpose: · analysis of the rights and obligations of the partiesinvolved in the contract and the allocation of risksconcerned; · a range of ‘ decision tree ’ charts, analysingthe main features of the 1992 Red Book, including risks,indemnities and insurances, claims and counterclaims, variations,procedure for claims, programme and delay, suspension, payments andcertificates, dispute resolution mechanisms, and disputeboards; · a much enlarged discussion of the meaning of “ claim ” and “ dispute ” and the types ofclaim with a discussion of the Notice provision in the 1999 formsof contract for the submittal of claims by a contractor and by anemployer; · the FIDIC scheme of indemnities and insurancerequirements; and the methods of dispute resolution provided by thevarious forms of contract; and · five new chapters in this third edition, the first fourchapters deal with each of the 1999 forms and the fifth chapter isconfined to the topic of Dispute Boards.

FIDIC Contracts: Law and Practice is sure to become the leading industry standard guide to using the FIDIC forms, and is the only book to date which deals with the whole suites of contracts, including the new gold book for Design, Build and Operate projects. The White & Case work is outstanding in its detailed consideration and treatment of the legal aspects of the interpretation and application of the Conditions, touching on many points that most people would not have encountered. Humphrey LLoyd, International Construction Law Review [2010] ICLR 386

Provides a clear and comprehensive guide to the 2017 FIDIC contracts—written by a member of the FIDIC Updates Task Group FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each, before providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer ' s Representative ' s function in the Silver including the new procedure for determinations as well as the Employer ' s obligations and contract administration. The Contractor ' s obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer ' s right to suspend the works; testing on and after completion and the Employer ' s taking over of the works; defects after taking over, acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts Accessible to those with little or no familiarity with FIDIC contracts The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.

Reveals the man and the aims of the Cultural Revolution.

In this unique guide to the suite of contracts published by FIDIC (The International Federation of Consulting Engineers) - the contract forms most widely used for international construction undertakings - twenty-two outstanding authorities in construction law from a wide variety of countries, describe relevant likely pitfalls (and special opportunities) for foreign lawyers in each of their jurisdictions. This very useful book will be extremely welcome to in-house counsel who must evaluate the legal disposition of a proposed or pending construction contract subject to the laws of a foreign jurisdiction. It will continue to be of service as long as the project proceeds and beyond, particularly for the optimal resolution of disputes.

In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 ' ' Orange Book ' ' ). These conditions, known as the ' ' FIDIC rainbow, were the Conditions of C- tract for: I Construction, the so-called Red Book, for works designed by the Employer I Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor I EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The ?rst is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arran- ment, generally with an Employer ' s Representative as one of the parties.

When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer ' s and Engineer ' s Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer ' s role in the preparation of tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author ' s earlier book, Contractor ' s Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor – represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book ' s companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer ' s Order for Varied Works Model Form of Daywork/Daily Record Sheets
