For courses in introductory psychology. Explore psychology through its most influential studies Forty Studies that Changed Psychology , first published 25 years ago, remains one of the field's most comprehensive introductory texts. In exploring the most commonly cited studies, Forty Studies guides students through both the history of psychology and the diverse disciplines that comprise the field. By covering the context, hypothesis, summary, and other aspects of these studies that have so heavily influenced psychology, the text fills the gap between major research and the textbooks they engender. The 8th Edition has been updated to include more than 30 new, modern studies that cite one or more of the influential studies.

An authoritative review of foundational research in criminal justice. Forty Studies that Changed Criminal Justice, 2e presents a thorough yet concise summary of the major and influential research studies in the field of criminal justice. Knowledge in criminal justice is developed with research, yet introductory textbooks fail to offer more than cursory synopses of the significant empirical studies that established the foundation of the discipline. This book provides a rich understanding of important research published in each of the three general areas of criminal justice: policing, courts, and corrections. More than a just collection of original published articles, the text is a summary of studies that have shaped the criminal justice system.
