<p>Amazon.com: Customer reviews: How "God" Works: A Logical ...</p> <p>Logic is grounded not in God's creative activity, but in His nature!God is by nature perfectly logical. As such, logic is not something distinct from God that He creates; it's ultimately a reflection of God's mental nature (as moral truths are ultimately a reflection of His moral nature).</p>
--

<p>God and logic - creation.com</p> <p>We also know that God Himself is logical, based on His words and His actions. First and foremost, God acts in a logical way: He plans, communicates, discusses, and acts. God even speaks of [reasoning] with human beings (Isaiah 1:18). He distinguishes between truth and falsehood, a core aspect of basic logic (John 7:18).</p>
--

<p>Is God logical? GotQuestions.org</p> <p>It is a way of identifying the relationships between ideas. Logic appears to be one of the natural laws God put into place at the creation of the universe. Then, God created mankind with a mind and the ability to reason. Being a creation of God, logic is a good thing which, when used properly, can point us toward God.</p>

<p>Review: [How [God] Works] by Marshall Brain - Dangerous Talk</p> <p>God At Work Through Language and Logic At GCCA Periodically throughout our school year, we will feature articles in our series, [Glimpses of Grace: Stories of God At Work At GCCA.] In this month's article, Grace Classical Christian Academy first grade teacher, Mrs. Faith Hurt, shares how she has seen God at work both in her classroom as ...</p>

<p>God At Work Through Language and Logic At GCCA [Grace ...</p> <p>Both the idea of God and the person of God are logical. Believing in the existence of God will explain many of the philosophical questions that people have as well as some of the mysteries of the universe. Logically, think of the concept of time—it had to begin at some point. God exists outside of time, so He is the creator of time and space.</p>

<p>Is God logical? - CompellingTruth.org</p> <p>Gödel's ontological proof is a formal argument by the mathematician Kurt Gödel for the existence of God. The argument is in a line of development that goes back to Anselm of Canterbury. St. Anselm's ontological argument, in its most succinct form, is as follows: "God, by definition, is that for which no greater can be conceived. God exists in the understanding. If God exists in the understanding, we could imagine Him to be greater by existing in reality. Therefore, God must exist." A more ...</p>

<p>Gödel's ontological proof - Wikipedia</p> <p>The Christian can know with absolute certainty that laws of logic will work tomorrow just as they have today because God does not change. After all, God is beyond time, so of course He will not change. Laws of logic are abstract because they reflect God's thinking, and all thinking is abstract by definition.</p>

<p>The Biblical Basis for the Laws of Logic Biblical ...</p> <p>I'll update my review, but if you want a logical outline of why The Bible is pre-scientific mythology, full of contradictory messages and how "god" is both cruel and imperfect (by the bible's own words) and how prayer does nothing, this is your book.</p>
--

<p>How God Works: A Skeptic Questions Belief by Marshall Brain</p> <p>God is not logical because logic is for the finite and the fallible. It is a structure created and given by God so that beings with limited knowledge could solve problems and have a reasonable world. Logic is a framework for understanding created beings and their doings, but God is not created. He is not finite.</p>

<p>God Is Not Logical - The Blazing Center</p> <p>And although we cannot see God himself, we can know that he exists with absolute certainty. Dr. E. A. Maness stated the matter correctly: [If the word [God] were written upon every blowing leaf, embossed on every passing cloud, engraved on every granite rock, the inductive evidence of God in the world would be no stronger than it is ...</p>

<p>Uses a scientific approach to answer the question of whether God exists, and examines the thinking processes and techniques that help inform a person's faith.</p>

<p>The only true and unedited telling of the life of Christ—his life and times, in historical context, but not lacking the psychology behind his physical being and spirit. Unlike other books seeking to strip Jesus' story to reveal only the human being, Romano Guardini's The Lord gives the complete story of Jesus Christ—as man, Holy Ghost, and Creator. Pope Benedict XVI lauds Guardini's work as providing a full understanding of the Son of God, away from the prejudice that rationality engenders. Put long-held myths aside and discover the entire truth about God's only begotten Son.</p>

<p>Today's New Atheists don't just deny God's existence (as the old atheists did) - they consider it their duty to scorn and ridicule religious belief. We don't need new answers for this aggressive modern strain of unbelief: We need a new approach. In Answering Atheism, Trent Horn responds with a fresh and useful resource for the God debate, based on reason, common sense, and more importantly, a charitable approach that respects atheists' sincerity and good will, making this book suitable not just for believers but for skeptics and seekers too. Meticulously researched, and street-tested in Horn's work as a pro-God apologist, it tackles all the major issues of the debate, including: -Reconciling human evil and suffering with the existence of a loving, all-powerful God -Whether the empirical sciences have eliminated the need for God, or in fact point to him -How atheists usually deny moral laws (and thus a moral lawgiver) in theory</p>

<p>The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.</p>
--

<p>Christopher Hitchens, described in the London Observer as [one of the most prolific, as well as brilliant, journalists of our time] takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's Why I Am Not a Christian and Sam Harris's recent bestseller, The End Of Faith, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.</p>

<p>Can a religious truth be logically proven, or is religion forever relegated to being a matter of blind faith? If there is a true religion, shouldn't we be able to prove it by now, using scientific data and higher mathematics? This is exactly what Paul Kasch sets out to do in his latest work. The reader is invited to follow along in the investigation process as we: [Establish an unbiased, neutral mindset [Look around at the environment we find ourselves living in, and attempt to solve the question of our existence [Gather the world's major religions, logically arrange and dissect them, and require them to present demonstrable truth of their claims This book would not exist if the quest failed. Using nothing more than the reasoning prowess we are all born with, a solitary (yet timeless) religious truth emerges as the equation of the only sound logical argument capable of producing such a thing. Use your head for something other than a hat rack and join the author on an intellectual journey which renders all other pursuits trivial by comparison.</p>
--

Throughout history, arguments for and against the existence of God have been largely confined to philosophy and theology, while science has sat on the sidelines. Despite the fact that science has revolutionized every aspect of human life and greatly clarified our understanding of the world, somehow the notion has arisen that it has nothing to say about the possibility of a supreme being, which much of humanity worships as the source of all reality. This book contends that, if God exists, some evidence for this existence should be detectable by scientific means, especially considering the central role that God is alleged to play in the operation of the universe and the lives of humans. Treating the traditional God concept, as conventionally presented in the Judeo-Christian and Islamic traditions, like any other scientific hypothesis, physicist Stenger examines all of the claims made for God's existence. He considers the latest Intelligent Design arguments as evidence of God's influence in biology. He looks at human behavior for evidence of immaterial souls and the possible effects of prayer. He discusses the findings of physics and astronomy in weighing the suggestions that the universe is the work of a creator and that humans are God's special creation. After evaluating all the scientific evidence, Stenger concludes that beyond a reasonable doubt the universe and life appear exactly as we might expect if there were no God. This paperback edition of the New York Times bestselling hardcover edition contains a new foreword by Christopher Hitchens and a postscript by the author in which he responds to reviewers' criticisms of the original edition.

Written by an L. A. County homicide detective and former atheist, *Cold-Case Christianity* examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. Christianity could be defined as a "cold case": it makes a claim about an event from the distant past for which there is little forensic evidence. In *Cold-Case Christianity*, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of Christianity. A unique apologetic that speaks to readers' intense interest in detective stories, *Cold-Case Christianity* inspires readers to have confidence in Christ as it prepares them to articulate the case for Christianity.

Is There a God? offers a powerful response to modern doubts about the existence of God. It may seem today that the answers to all fundamental questions lie in the province of science, and that the scientific advances of the twentieth century leave little room for God. Cosmologists have rolled back their theories to the moment of the Big Bang, the discovery of DNA reveals the key to life, the theory of evolution explains the development of life... and with each new discovery or development, it seems that we are closer to a complete understanding of how things are. For many people, this gives strength to the belief that God is not needed to explain the universe; that religious belief is not based on reason; and that the existence of God is, intellectually, a lost cause. Richard Swinburne, one of the most distinguished philosophers of religion of our day, argues that on the contrary, science provides good grounds for belief in God. Why is there a universe at all? Why is there any life on Earth? How is it that discoverable scientific laws operate in the universe? Professor Swinburne uses the methods of scientific reasoning to argue that the best answers to these questions are given by the existence of God. The picture of the universe that science gives us is completed by God.
