American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making

automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, *Made in Korea* takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

This book charts the growth and achievements of one of the world's most important industries. The authors, two leading figures in the German automotive industry, describe the strategies that have led to the German industry's great success. They also discuss how German auto manufacturers are meeting challenges from emerging worldwide competitors. This book demonstrates what can be achieved with first-class management, marketing, branding, innovation and clear strategic aims, and as such it holds valuable lessons for managers in all industries.

This laboratory manual accompanies the eighth edition of *Chemistry in Context: Applying Chemistry to Society*. This manual provides laboratory experiments that are relevant to science and technology issues, with hands-on experimentation and data collection. It contains 34 experiments to aid the understanding of the scientific method and the role that science plays in addressing societal issues. Experiments use microscale equipment (wellplates and Beral-type pipets) and common materials. Project-type and cooperative/collaborative laboratory experiments are included. With the movement towards sustainability and “green

chemistry ” , the investigations in this lab were developed to use minimally toxic reagents, and to use them in small quantities, where possible.

The Halifax became the second of the new generation of four-engine heavy bombers to enter service with RAF Bomber Command in the Second World War. It flew its first offensive operation in March 1941 and by 1944 it had become the exclusive equipment for Bomber Command's 4 Group and 6 (Canadian) Group, as well as being used in smaller numbers by 100 (Bomber Support) Group. The Halifax flew on virtually all the main raids of the night offensive between 1942 and 1945 and the last occasion when Bomber Command Halifaxes operated in strength against the enemy was on 25 April 1945.
