This complete frog dissection kit comes with: an extra-large preserved grass frog (double-injected so you can clearly see veins and arteries) all the dissection tools you need: full-color photographic dissection guide, #22 broad-blade scalpel, stainless steel scissors, plastic forceps, 6 T-pins, and a disposable dissecting tray.

### Frog Dissection Kit for Kids Science Anatomy Lab | HST

1. Place your preserved frog in a dissecting tray with the ventral surface up. With dissecting pins, securely pin the frog's feet and hands to the bottom of the dissecting tray. Angle the pins away from the body of the frog so that they will not interfere with your dissection. 2. With forceps, lift the loose skin of the abdomen.

### Lab: Frog Dissection Introduction - astephenscience

Place your frog on its back and pin it to the dissecting tray. 2. Lift the frog's skin with forceps between the rear legs. 3. Make a small cut through the lifted skin with the scalpel. This is a starting place for the scissors. Take care to cut only the skin. 4. Use the scissors to continue the incision up to the midline all the way through the frog's

### Frog Dissection - FLIPPED OUT SCIENCE

Lay the frog ventral surface up on the dissecting tray. Pinch the loose skin at the center of the frog's stomach and make an initial cut with the scissors into the skin. Cut through the skin, following the pattern shown in the diagram below. Follow the same pattern to cut through the muscle and reveal the internal organs.

Lab Resources - The frog dissection gallery is a good resource for teachers and students to review the parts of the frog. I also encourage my students to try to discover the answers to their questions before asking for help. I have resources such as lab manuals and frog dissection guides laying around the lab.

Specimens are single, double, or triple injected—meaning 1, 2, or 3 of the above systems are injected, each with a distinct color. However, color and injected systems vary among specimens.

### Guide to injection colors for preserved specimens

Description This large preserved grass frog specimen measures 4" to 4.5" in body length. It's double injected, meaning the arteries are injected with red latex and veins are injected with blue latex to easily trace the vascular system. Its size makes the internal organs and external structures simple to locate and easy to identify.

The injection mass should have filled not only the pericardial sinus, but also the efferent branchial vessels which leave the sinus and diverge as they extend ventrally and terminate along the edges of the gills. Remove the remaining gills on the left side of the body and carefully pick the injection mass away from the sinus to expose the heart.
