Placental Pathology A Survival Guide

Placental Abruption and Cerebral Palsy. Cerebral Palsy (CP) can develop for various reasons, including complications of the placenta. Since infants lose oxygen when placental abruption occurs, the lack of oxygen at birth may lead to brain damage, which in turn may lead to CP. The risk of an infant developing CP will depend upon the length of time they go without oxygen, how much of the placenta separated from the uterine wall, how long the infant is in utero before delivery, and the infant ...
