From international bestselling author Marc Levy comes a witty and beguiling novel of one woman's unexpected journey to follow her destiny. Alice Pendelbury believes everything in her life is pretty much in order--from her good friends to her burgeoning career. But even Alice has to admit it's been an odd week. Not only has her belligerent neighbor, Mr. Daldry, suddenly become a surprisingly agreeable confidant, but he's encouraging her to take seriously the fortune-teller who told her that only by traveling to Turkey can Alice meet the most important person in her life. What's more, the peculiarly insistent Mr. Daldry has even agreed to finance Alice's trip--one that against all reason seems to be predestined. It's on this journey, crazy from the outset and strangely irresistible, that Alice will find out that nothing in her life is real, that her past is not true, and that the six people she's about to encounter will shape her future in ways she could never have

In the Hugo-award winning, epic New York Times Bestseller and basis for the BBC miniseries, two men change England's history when they bring magic back into the world. In the midst of the Napoleonic Wars in 1806, most people believe magic to have long since disappeared from England - until the reclusive Mr. Norrell reveals his powers and becomes an overnight celebrity. Another practicing magician then emerges: the young and daring Jonathan Strange. He becomes Norrell's pupil, and the two join forces in the war against France. But Strange is increasingly drawn to the wild, most perilous forms of magic, and he soon risks sacrificing his partnership with Norrell and

everything else he holds dear. Susanna Clarke's brilliant first novel is an utterly compelling epic tale of nineteenth-century England and the two magicians who, first as teacher and pupil and then as rivals, emerge to change its history.

January 2011 marks the 20th anniversary of the start of Operation Desert Storm, as well as two decades of continuous American military involvement in the Persian Gulf region. A number of questions about

that first Gulf War and its consequences have never been answered. Why was President George H.W. Bush so surprised that Saddam Hussein invaded Kuwait? Did America's intelligence community fail to warn him of the threat, or did he ignore their predictions of an invasion? Why did the CIA and the Pentagon deny so vehemently for so long that sick Desert Storm veterans were exposed to Iraq's chemical agents? Patrick G. Eddington tackles these and other questions in *Long Strange Journey: An Intelligence Memoir*, which details his career as a military analyst at the Central Intelligence Agency from 1988 to 1996. *Long Strange Journey* is a first-person account of the high-tech, space-based side of the intelligence business. Although President Carter first revealed the existence of our imagery spy satellites nearly 30 years ago, no analyst who has used those systems has written a book on the topic and got it past CIA censors until now. Eddington's tenure at the CIA

spanned the transition from the Cold War to the new era of American interventionism in the Persian Gulf and the Balkans. The book draws upon not only his direct experience reporting on these events for senior government policy makers, but also upon thousands of pages of previously classified documents secured through litigation he pursued during the last decade.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical

brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in

years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Having survived the worst effects of the Civil War, the city of Memphis, battered but unbowed, finds itself facing a far more dangerous foe. It is invisible, lethal, and unstoppable: a plague of yellow fever. It is the story of JP Mahoney, 14-year-old farm boy who dreams of escape from tedious chores and farmlife routine. It is the story of a courageous young woman, Ginnie Moon, onetime Confederate spy, who now operates a boarding house for men who have survived the war. And it is the story of Kevin O'Boyle, an embittered riverfront laborer, who blames the world for his troubles,

and finds the crippled city his perfect prey. Several characters in the novel are actual historical figures, most notably Ginnie Moon, Judge "Pappy" Hadden, and Cap'n Jim Lee. Their actions, and those of the other characters, are entirely fictional. The plague, one of several to hit the city in the years following the war, was all too real.
